

The Haploid Genetics Company

Technical Assistant (m/f)

full-time position

Haplogen is a Vienna-based biotech company that operates in the areas of experimental genetics and infectious disease. Haplogen uses a proprietary technology to knock out genes in human cells and identify drug targets in the area of infectious diseases (Carette et al. (2009) *Science*, Carette et al. (2011) *Nature Biotechnology*, Bürckstümmer et al. (2013) *Nature Methods*). Our team is young, dynamic and international.

Haplogen is looking for a highly motivated **Technical Assistant (m/f)** in the area of **Molecular Biology** ideally with experience in one or more of the following areas:

- Recombinant protein production and purification
- Cell Culture (cultivation of mammalian cells, transfection, retroviral transduction)
- Molecular biology (cloning, plasmid preparation, SDS-PAGE, ...)

Strong commitment, the ability to work independently, as well as an excellent team spirit are essential. Experience in the area of infectious diseases and/or drug discovery would be desirable.

As Haplogen operates in an international environment English is the working language.

The successful applicant will be involved in exciting projects in the area of drug target identification/validation and early stage drug discovery.

To be formally eligible, you should have completed a Höhere Technische Lehranstalt (HTL), a Bachelor's Degree or a Master's Degree. If you are interested, please send your application to Ms. Sarah Olaniyan (olaniyan@haplogen.com) no later than April 30, 2014.
