

Take part in the development of a new research institute and team!

IST Austria is a new postgraduate institute dedicated to being a world-class research center focused on the natural sciences, located in **Klosterneuburg** on the outskirts of Vienna.

The developmental cell biology team of **Professor Dr. Daria Siekhaus** is an ambitious new group at IST Austria working in the field of invasive migration using *Drosophila melanogaster*. We genetically identify mutants that affect cellular barrier penetration, and characterize them molecularly, cellularly and by live imaging. To complement our international team (working language is English), we seek applications for a

Technical Assistant (f/m)

full time

Your Responsibilities:

- *Drosophila* crossing
- Cell biology (immunohistochemistry, live embryo microscopy), molecular biology (PCR, cloning), cell culture, flow cytometry

Your Profile:

- Training as MTA/ CTA/ BTA or equivalent education
- Previous experience in at least one of the above techniques
- Work experience in a scientific environment is advantageous
- Very good command of English and German
- Team player with excellent communication skills

We welcome flexible and reliable team players who are interested in working in an international environment conducting cutting edge science within a diverse and dynamic working atmosphere. We offer a competitive salary including social benefits and opportunities for further education and training.

Salary starting from EUR 1,800 gross/month. Possibility of higher salary depending on education, qualification and work experience.

IST Austria values diversity and is committed to equality.

To apply for this position, please send your application (including CV, photo, certificates and references) by e-mail to michaela.stoeckel@ist.ac.at
