

Lexogen is a biotech company based in Vienna, Austria, focusing on the development of innovative tools for transcriptome research. We are operating a state-of-the-art R&D and production facility and have successfully launched RNA-Seq library preps kits into a growing market.

### **Technical Assistant – Reference No. 24**

Molecular Biology R&D (f/m)

#### **Position**

We are looking for a Technical Assistant to join our research and development team.

#### **Responsibilities**

- Perform a variety of standard molecular biology laboratory procedures
- Purify, process, and analyse nucleic acids
- Implement and troubleshoot proprietary methods into workflows
- Support planning and preparing of new experiments
- Exact documentation of experiments and thorough basic analysis of data
- Quality control of products and helping out in production on demand
- Working according to strict quality guidelines

#### **Requirements**

- Experience with standard molecular biology techniques is mandatory
- Attention to detail in experiments is essential, GLP & GMP awareness preferable
- Self-motivated hands-on mentality, team spirit and good organizational skills
- Ability and interest to work in a fast paced R&D environment
- Experience with NGS workflows, cell cultures, and single cell experiments are assets
- Good command of the English language
- Good applied computer skills required (MS office and molecular biology applications)
- Education:
  - MSc, BSc or FH diploma or equivalent degree
  - Technical college for chemistry, molecular biology or life sciences
  - Assistant medical technician, chemical technical assistant or equivalent

#### **Application**

This is an exceptional opportunity to join a fast growing biotech company at an early stage and to help shaping a future leader in the gene expression analysis market.
