

# RESEARCH TECHNICIAN

**IMBA Institute of Molecular Biotechnology** of the Austrian Academy of Science is an internationally recognized research institute that focuses on molecular medicine, stem cell research and RNA biology and is home to 150 scientists of over 26 nationalities. It locates in the Campus Vienna Biocenter, very close to the city center of Vienna. Science carried out in IMBA is absolutely at the top level and IMBA carries a great state-of-the-art infrastructure and the top research programs for the different career-level of scientists.

We have a vacancy for a full-time technician to join the **Haplobank team at IMBA**. We seek applicants with a degree from a MTA academy or equivalent who will contribute to Haplobank's research efforts with regard to the development of a genome-wide library of mutagenized murine embryonic stem cells. The successful applicant would predominantly work on the generation of knockout cell lines, and the expansion and maintenance of individual clones. Moreover, we are using a broad range of cell biology, tissue culture, and molecular biology techniques to constantly improve and evaluate the technology. Working experience in (ES) cell culture is essential, and basic knowledge of molecular biology techniques advantageous. Strong commitment, independent work, good organizational skills and excellent team spirit are all essential, as well as a good command of English.

If you are interested in this challenging position, please send a letter of motivation describing your particular interest in this position and past research experiences, a curriculum vitae and names of referees to
