

Horizon Genomics is a biotechnology company in Vienna, Austria, that is part of the Horizon Discovery Group. It employs a powerful functional genomics platform based on a unique set of haploid human cell lines. Using these cells we established the largest collection of validated human knock-out cell lines thereby empowering biomedical research. In addition, Horizon Genomics offers partnerships to perform unbiased genetic screens in human cells for drug target discovery and to elucidate drug mechanism of action. As part of its commitment to support experimental human genetics in the wider scientific community, Horizon Genomics is developing next generation genome editing tools.

Horizon Genomics is looking for two **Technical Assistants (m/f)** in the area of **Cell Culture** with experience in:

- Work under sterile conditions
- Culturing, freezing and thawing of mammalian cells
- Expansion and banking of large numbers of cell lines

Good knowledge on MS Word and Excel is a prerequisite for your daily work. As Horizon Genomics operates in an international environment, good English skills are required.

To be formally eligible, you should have completed a Höhere Technische Lehranstalt (HTL) or a Bachelor's Degree. We are looking for a team player that is very detail-oriented and enjoys performing routine tasks. If you would like to be part of a young and exciting company, please send your application to Mrs. Sarah Olaniyan ([office.genomics@horizondiscovery.com](mailto:office.genomics@horizondiscovery.com)) no later than June 27, 2015.

Horizon Genomics is part of the Horizon Discovery Group. Find more information about Horizon here:
