

Research Technician (full-time)

IMBA Institute of Molecular Biotechnology of the Austrian Academy of Science is an internationally recognized research institute that focuses on molecular medicine, stem cell research and RNA biology and is home to 200 scientists of over 30 nationalities. It locates in the Campus Vienna Biocenter, very close to the city center of Vienna. Science carried out in IMBA is absolutely at the top level and IMBA carries a great state-of-the-art infrastructure and the top research programs for the different career-level of scientists. We have a vacancy for a full-time technician to join the team of **Oliver Bell's** lab.

In addition to lab organisation, the main responsibilities include development of experimental techniques, generation of transgenic cell lines using CRISPR genome editing and basic molecular analysis (Western blot, RT-qPCR, flow cytometry).

Successful applicants should have experience in molecular biology, protein biochemistry and mammalian tissue culture. She or he should be friendly, well-organized, highly motivated to learn and interested in exploring new techniques. We are looking for a team player who is also able to work independently. Good English-language communication skills are essential.

We offer a young, dynamic, and international working environment, further training in molecular biology and genetics, and the chance to make an important contribution to basic biomedical research.

Applications, including a letter of motivation describing your particular interest in this position and past research experiences, a CV and the names and contact details of referees should be sent to:

Dr. Oliver Bell

Institute of Molecular Biotechnology Dr. Bohr-Gasse 3 1030 Vienna Austria
