

Lab-Technician Position in the lab of Michael Jantsch at the Medical University

A position for a technician is free as of November 1st 2018 in the lab of Michael Jantsch at the Medical University of Vienna.

<https://anatomieundzellbiologie.meduniwien.ac.at/en/cell-biology/epigenetics-and-rna-biology/group-jantsch/>

The lab does research in RNA-Biology using cells and mice as a model.

Job description:

The job would involve working on ongoing projects on the regulation of RNA modifications. This would involve tissue culture work, molecular biology work, NGS library preparations, mouse genotyping.

Required skills:

Previous experience in molecular biology and tissue culture work is of advantage.

The position is initially limited for one year with the option of permanent extension.
