

ACIB – the Austrian Centre of Industrial Biotechnology – is one of the leading research centres in the field of industrial biotechnology. ACIB is dedicated to joint research at the industrial-academic interface. Seven Austrian Universities and more than 25 leading industry partners are working together within the ACIB research program.

Starting with October 2016, ACIB offers in Vienna a

***Full-time technician position
for protein analysis and method validation in the project***

Monitoring of Downstream Processing

Project description

In situ monitoring of protein concentration, purity, and potency is the basis for parametric or real time release irrespective whether the production is performed on a batch or in a continuous mode. At ACIB and DBT/BOKU we have already developed statistical tools for data handling, extraction and interpretation in the field of upstream processing which will be extended also for downstream processing. Objective of the current project is to establish tools to monitor real time protein concentration, purity and potency for chromatographic methods in downstream processes.

Your profile

- HTL Biochemistry or Biotechnology or BSc Biotechnology or adequate
- Excellent knowledge and practical expertise of protein analytic such as SDS-PAGE, Western Blot, ELISA, HPLC and method validation required
- Knowledge of protein purification wished
- Distinct team spirit strongly required

Application deadline: 15.10.2016

Please send your application in pdf format to jobs@acib.at indicating the reference number 16_2016 in the subject of the email.

ACIB is dedicated to a well balanced gender ratio. Therefore this job advertisement addresses qualified male and female persons equally. ACIB is not part of any collective agreement under Austrian law. It is intended to offer a minimum yearly gross payment of EUR 28.200,-- for the technician position advertised. Payment is depending on qualification and professional experiences.
