

Where do scientists work with top-notch teams and leading-edge technology?

How to biotransform mycotoxins enzymatically? This is one of the questions our internationally renowned Molecular Biology Scientists **in Tulln** are working on. You want to be one of them? Join us as

Project Leader Molecular Biology (m/f)

Tulln (Austria) / Job#12061

These are the tasks we trust in you:

- Leadership of a project dedicated to recombinant enzyme production
- Application and further development of molecular gene expression tools and clone screening systems
- Engineering of established protein production hosts and exploration of new production systems
- Development of innovative solutions for overcoming enzyme production bottlenecks
- Active involvement in external collaborations and implementation of gained knowledge

To leave your footprint with us you need the following skills:

- A graduate (preferably PhD) scientist with project management experience
- Expertise in heterologous protein production in different expression systems (bacterial, fungal, etc.)
- Experience in the field of strain engineering and production clone screening
- Sound knowledge of Molecular Biology techniques and enzyme characterization
- Team spirit and hunger for success

Our culture: Pioneers, Partners and Performers. That means for you:

You work in world class laboratories with state of the art equipment on key topics of the global food chain. As part of our young and ambitious scientific team you work with the best in their class in an important niche market. BIOMIN is constantly growing. This creates a lot of space for good ideas and opportunity for personal growth and development.

Due to Austrian legal requirements we have to state that the minimum legally defined salary for this position is EUR 22.400,- gross per year (full-time). Our actual remuneration packages are in line with attractive market salaries.

At **BIOMIN** we harness the power of science to support animal health and performance. By applying state-of-the-art and proprietary technology we deliver natural, sustainable and profitable solutions to the livestock industry. For over 30 years we have pioneered innovative solutions for mycotoxin risk management and gut performance.

BIOMIN is a division of ERBER Group.

Are you ready to leave your footprints with us at BIOMIN?

We are looking forward to your online application [Project Leader Molecular Biology m/f \(Job#10261\)](#)
