

Job vacancy at the Medical University of Vienna / Anna Spiegel Research Center for Translational Research (MUW / ASCTR)

The “Genes and Disease Group” at the Medical University of Vienna, is seeking to recruit a Research Laboratory Technical Assistant (TA). The TA will be involved in organizing and maintaining standard operating procedures in the lab as well as training of new/junior lab members in basic techniques and assisting ongoing project-oriented research. Functional studies applying genetic, molecular and biochemical methods to cell cultures and genetically engineered mouse models will be conducted. We offer the opportunity to work in an excellent, multidisciplinary environment in a modern research building (ASCTR), within the MedUniWien/AKH campus.

Requirements:

Chemical Technical Assistant (CTA, m/w) degree, Bachelor/Master in Biology/Biochemistry/Life Sciences or equivalent. Practical and theoretical knowledge of general analytical methods. Experience in cell culture, extraction of RNA and protein, ELISA, qPCR and histology techniques. Experience (certification) in animal handling and experimentation (mouse handling and necropsy) would be an asset. Computer and organization skills, good team worker and excellent knowledge of English is desirable—applications only in English.

How to apply:

Applicants should send a single pdf document with a cover letter stating past and future research interests, CV, referees contacts and if applicable, publication list to: **latifa.bakiri@meduniwien.ac.at** or **erwin.wagner@meduniwien.ac.at**
