

Scientific Assistant for cell culture **(f/m/d) full-time**

Virusure is a young enterprising biotechnology company based in Vienna specialising in the virus and prion safety of biopharmaceutical products. We are looking to build and strengthen our existing team with the following positions:

Scientific Assistants for cell culture

Your responsibilities will be the growth and maintenance of cell lines and preparation of media, including organizing supply of media, media components and plastic ware, support of GLP/GMP departments with cells and media as well as completion of GLP documentation.

Our candidates require excellent English skills, must be able to work accurately, should be familiar with basic computer skills, and be prepared to work with infectious biological agents (i.e. viruses). Experience in a GXP (i.e. GLP or GMP) and/or ISO environment would be advantageous.

If you are looking to work in a dynamic, friendly and exciting growing environment, please send your application and a copy of your Curriculum Vitae to:
